Preparing for the ACT: Mathematics & Science Reasoning

Second Edition ©2011 by Robert D. Postman

Take Your Students to the Next Level!

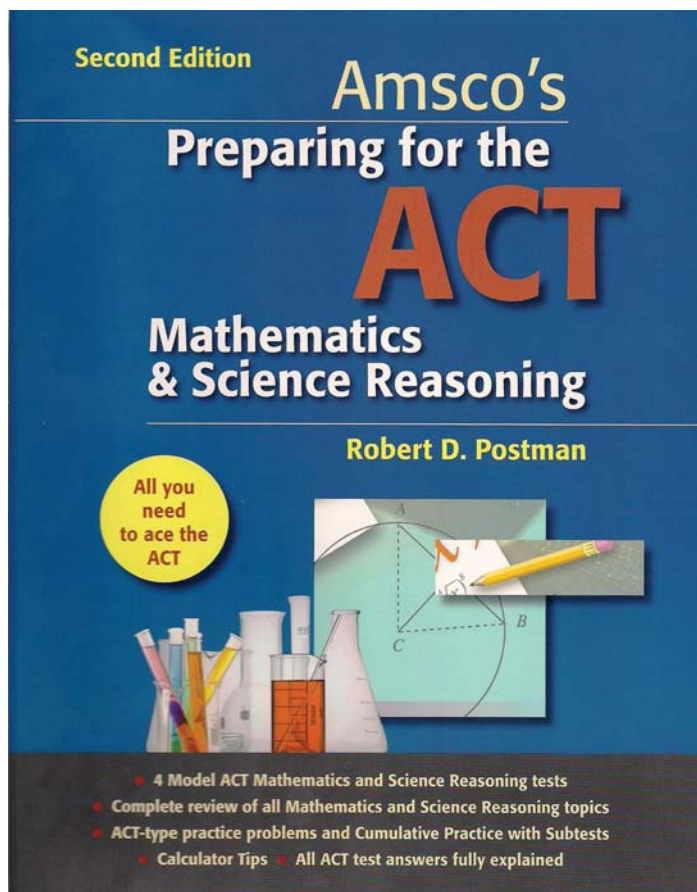

Ramp up instruction and practice with a book that is a logical addition to the high school mathematics curriculum, whether the goal is to meet graduation requirements or to pave the way for success in college and careers.

This comprehensive book features:

- Self-contained Math and Science Reasoning sections that can be used independently.
- A **thorough review** of pre-algebra, algebra, geometry, and trigonometry with **Examples** and worked-out **Model ACT Problems**.
- A **Math Topic Inventory**, which assesses students' strengths and weaknesses, and can be used to target instruction.
- **Calculator Tips** highlighting the use of the calculator on the ACT.
- **Cumulative Review** and **ACT-style Subtest** at the end of each math chapter.
- Instruction and practice with the three main types of **Science Reasoning** questions.
- An **Answer Key** in the student book for all Practice, ACT-Type Problems, Cumulative Reviews, and Subtests.
- **Diagnostic Tests** referring students to appropriate sections for additional targeted review.
- Four **Model ACT Math and Science Reasoning Tests** with answers explained.
- An informative chapter on getting into and paying for college.
